PROFESSIONAL SUMMARY

Passionate and fast-learning Cybersecurity student with a strong foundation in Vulnerability Assessment, Threat Analysis, and implementing defensive security strategies to protect digital assets. Proficient in Network Security, Incident Response, and familiar with SIEM tools. Committed to continuous learning and staying current with emerging cyber threats. Eager to apply technical skills in a challenging role to contribute to a robust security posture, risk management, and the development of innovative software solutions.

PROJECTS

Vulnerability Assessment & Penetration Testing — Cybersecurity Analysis | Q3 2024

Performed vulnerability scanning on multiple Windows and Linux systems using OpenVAS and Nessus to identify security flaws and misconfigurations

- Analyzed scan results to assess severity levels and prioritize remediation efforts
- Created detailed vulnerability assessment reports outlining identified issues, their potential impact, and recommendations for mitigation
- Contributed to the improvement of system security by aligning findings with industry best practices

Nutrition Tracker | Full-Stack AI Application

Q1 2025

- Engineered a full-stack health application with Node.js and PostgreSQL backend, featuring secure user authentication and data storage
- Integrated an AI-powered chatbot for personalized user interaction and deployed the application in a containerized environment
- Developed a dynamic React.js frontend with Chart.js for real-time data visualization of nutritional intake and progress

Trade Check | Crypto Analysis Platform

Q2 2024

- Built a responsive, real-time cryptocurrency analysis platform using React.js, integrating with multiple public APIs for live market data
- Implemented interactive and dynamic charting features with Chart.js to visualize historical and current price trends
- Focused on component-based architecture for scalability and maintainability of the frontend codebase

The Reading Club | Web Development

Q1 2024

- Designed and developed a book discovery platform using vanilla HTML, CSS, and JavaScript, emphasizing responsive and accessible design
- Implemented a recommendation engine based on user-selected genres and reading history to enhance user engagement

EDUCATION

SRM Institute of Science and Technology

B.Tech, Computer Science (Cyber Security)

Expected Graduation: 2027

GPA: 9.2 / 10.0

TECHNICAL SKILLS

Languages:

C/C++, Java, Python, SQL, Bash Scripting

Cybersecurity:

Penetration Testing, Vulnerability Assessment, Network Security, Secure Coding, SIEM, Threat Modeling

Frameworks & Tools:

Linux (RHEL), PostgreSQL, Git, Docker, Nmap, Wireshark, openVAS, Burp Suite

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA)
- Google Cybersecurity Professional Certificate
- NPTEL - Programming in Java
- Object Oriented Programming in C++
